Dear Allen:

I feel very strongly that the National Security Council should take account of the thesis of the Kissinger book. Scientists as different in viewpoint as Teller and Oppenheimer have said that it is the most important publication in the field of nuclear power and strategy. I am sending you a second copy tomorrow. I beg that you have it digested for you in sufficient detail for you to be able to tell the President and his advisers about it.

All the best,

As ever,

Ham
